Abdullah Afzal

Place of birth: Malir Town | **Nationality:** Pakistani | **Gender:** Male | **Phone:** (+92) 3116702805 (Mobile) | **Email address:** afzalabdullah066@gmail.com | **Website:** https://abdullahportfolio.vercel.app | **LinkedIn:** Abdullah Afzal | **Address:** Karachi, Pakistan (Home)

ABOUT MYSELF

Senior Software Engineer with over 3+ years of experience in developing enterprise applications. Skilled in designing and implementing scalable web-based solutions, modernizing legacy systems, and automating business processes. Experienced in working with large-scale applications, improving operational efficiency, and contributing to digital transformation initiatives.

EDUCATION & TRAINING

20/07/2020 - 20/06/2024 - KARACHI, PAKISTAN

BACHELOR OF ENGINEERING IN SOFTWARE ENGINEERING- KARACHI INSTITUTE OF ECONOMICS AND TECHNOLOGY

- Programming & OOP (C++, Java, C#)
- Data Structures, Algorithms & Problem Solving
- Software Engineering & SDLC
- Databases & SQL
- Operating Systems & Computer Networks
- Web Development (Frontend & Backend)
- Software Architecture & Design Patterns
- HCI & User-Centered Design
- Information Security & Cybersecurity Basics
- AI Fundamentals & Data-Driven Decision Making
- Software Testing & Quality Assurance
- Project Management & Professional Practices
- Final Year Software Project

Field(s) of study: Software Engineering | **Final grade:** 3.47 | **Level in EQF:** 6 | **Website:** https://kiet.edu.pk/

WORK EXPERIENCE

20/11/2025 - CURRENT - KARACHI, PAKISTAN

SENIOR SOFTWARE ENGINEERRAJBY TEXTILE PVT. LTD

- Spearheaded the design and development of enterprise ERP and HRM systems serving 2,000+ users
- Engineered automated payroll workflows handling PKR 90M+ monthly while ensuring compliance with tax regulations
- Delivered full-cycle HRM solutions covering attendance, leave management, final settlement (FnF), payroll taxation, and reporting
- Implemented real-time attendance solutions through ZKTeco biometric integration and face-recognition mobile applications
- Led the migration of legacy desktop ERP modules to modern web-based platforms, achieving a 60% efficiency gain
- Partnered with cross-functional stakeholders to build secure, scalable, and high-availability enterprise applications

15/08/2023 - 19/11/2024 - KARACHI, PAKISTAN

ASSISTANT MANAGER - SOFTWARE ENGINEER TPL TRAKKER

- Contributed to the development of IoT-based tracking solutions involving both hardware and software components
- Analyzed client and project requirements to define scope, technical feasibility, and delivery milestones
- Assisted in the design, development, and testing of embedded and backend software for GPS tracking devices
- Worked closely with senior engineers to bridge technical specifications with real-world deployment requirements
- Supported integration and validation of IoT solutions to ensure reliability and operational effectiveness

01/01/2023 - 01/02/2023 - KAMRA, PAKISTAN

INTERNPAKISTAN AERONAUTICAL COMPLEX KAMRA

- Gained hands-on exposure to aerospace engineering environments, working alongside senior engineers on software-driven aerospace systems
- Assisted in the design, development, and testing of software applications supporting aerospace engineering and maintenance operations
- Contributed to system analysis, debugging, and validation activities for software used in aviation and defense-related projects
- Supported documentation, testing procedures, and compliance with engineering and safety standards
- Collaborated with multidisciplinary engineering teams to understand system requirements and operational constraints
- Developed a strong foundation in software engineering practices within regulated, high-reliability aerospace systems

SKILLS

Backend
JavaScript | Node.js | Laravel | SQL Server | MongoDB | C#

Core
.NET Core | Flutter | React | HTML | Bootstrap | CSS

Engineering Standards & Tooling
Git | Github | Microservices | Posman

LANGUAGE SKILLS

Mother tongue(s): **URDU**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	C2	C1	C1

CERTIFICATIONS

18/07/2024 Coursera

Developing Back-End Apps with Node.js and Express (IBM via Coursera)

Online - Gainedin-depthknowledgeofbackenddevelopmentusingNode.jsandExpress,including RESTful APIs, database management, and asynchronous operations.

Link

17/01/2024 Govt. of Sindh Haza Institue of Technology

Web Engineering (PHP + CodeIgnitor)

Presential - Focuses on web application development using PHP and the CodeIgniter framework, covering MVC architecture, database management, and security best practices.Write here the description...

PROJECTS

09/01/2026 - CURRENT

PinPoint (Real-Time Vehicle Tracking) I built web and mobile applications for real-time vehicle tracking using GT06 GPS devices, developing comprehensive dashboards, alert systems, and reporting tools tailored for fleet management. This solution enabled precise, real-time location tracking, significantly improved fleet monitoring capabilities, and streamlined overall management operations by providing actionable insights and automation.

06/03/2025 - 23/10/2025

Payroll Management System (ASP.NET Core MVC) Designed and developed a scalable payroll management system managing payroll operations for 1,500+ employees across two companies. Implemented key features including automated salary calculations, attendance integration with ZKTeco biometric devices, and comprehensive handling of deductions and allowances. Developed payslip generation and automated email distribution functionalities. Incorporated multi-level approval workflows to improve accuracy and streamline payroll processing. Additionally, built a Flutter-based facial recognition mobile application for management attendance, restricted via geo-fencing to operate only within office premises.

27/12/2024 - CURRENT

Noor & Sons ERP System I developed a comprehensive ERP system to manage inventory, sales, procurement, and finance, integrating key business processes into a single platform. The system included role-based access control, real-time reporting, and streamlined approval workflows to enhance operational efficiency. This solution centralized and automated core business functions, significantly improved reporting visibility, and reduced manual interventions across departments.

13/05/2024 - 18/11/2024

Tirmizimpex ERP System I designed and developed a robust ERP system using Laravel, streamlining company operations including inventory management and workflow processes within a unified platform. The solution centralized business activities, enhanced overall operational efficiency, and significantly reduced manual effort through automation and improved system integration.

16/10/2023 - 15/01/2024

GreenNest (Hydroponic Gardening App) Write here the descriptionI developed a mobile application along with a Node.js backend, integrating it with ESP32 controllers to power smart hydroponic systems. The solution enabled seamless communication between hardware and software, allowing users to monitor and control their hydroponic setups in real time. This significantly improved efficiency, automation, and ease of managing modern hydroponic gardening systems.
